

5th International Conference on Nano/Molecular Medicine and Engineering (IEEE-NANOMED 2011)

jointly organized with
2011 International Conference on Biotronics

November 9 - 12, 2011

Jeju, South Korea

Who should attend:

NANOMED is an annual international conference to bring together students, educators, researchers, scientists and engineers alike from all over the world and every sector of academy and industry, working at advancement of basic and clinical research in medical and biological sciences using nano/molecular and engineering methods. NANOMED is the conference where practitioners will see nano/molecular medicine and engineering at work in both their own and related fields, from essential and advanced scientific and engineering research and theory to clinical applications. This year's NANOMED is jointly organized with the 2011 international conference on BIOTRONICS.

The IEEE-NANOMED conferences are sponsored annually by the IEEE Nanotechnology Council.

Conference Scope:

- Nano and molecular technologies in medical diagnosis and therapy
- Nanotechnology in drug delivery
- Biomedical imaging
- Biochips and Bio-MEMS
- Biomechatronics
- Cells at the nanoscale
- Biological interface
- Frontiers in nanobiotechnology
